THE MORRISON TARIFF BILL.

The Currency Question—The Pacific Roads—Edison Married—Attempted Murder.

The Socialists Tried.

LONDON, February 24.—The hearing in the case of Burns, Hyndman, Unapman and Williams, Socialist leaders accused by the authorities of having incited the recent riots at Trafalgar Square and Hyde Park, was resumed to-day. The session was devoted principally to hearing the testimony of newspaper reporters as to the exact language used by defendants in their inflammatory speeches. Lyndman, before the proceedings were formally opened, entered complaint against the editor and proprietors of Punch, and asked for their arrest. He alleged that they had attempted to excite the public against defendants and prejudice their trial by publishing a picture of "Mr. Punch" in the act of publicly hanging them, in this way suggesting to the people a form of vengeance to inflict upon defendants. The magistrate declined Hyndman's request, saying he had no power to interfere on the grounds specified.

The Pacific Roads.

WASHINGTON, February 24.—Charles Francis Adams, president of the Union Pacific Railway Company, and ex-Senator McDonald, attorney for the Central Pacific road, appeared before the House committee on Pacific railways to-day and expressed their views at length upon the general subject of the indebtedness of the Pacific railways. Adams declared the present management of the Union Pacific company was endeavoring to fulfill the company's obligations to government in good faith and that the road was not manipulated for speculative purposes. A large proportion of the stock, he said, was held by trust companies, estates and widows. Unaided branch lines constituted the main source of revenue and without them the road could not be operated at a profit.

The Morrison Bill.

WASHINGTON, February 24.—The Secretary of the Treasury has written to Representative Morrison, chairman of the ways and means committee, in regard to the probable effects of the passage of the Morrison tariff bill will have upon public revenues. In the letter he says that the net reduction on the basis of last year's importations, would be about \$12,000,000. In regard to the proviso limiting the maximum of dues to certain ad valorem rates, it says it leaves room for controversy on values, but that values could be ascertained by customs officers. He suggests, however, that the provisions be made final and not leave this important question to be in after years subjected to the uncertainties of trial in court, with the consequent cost to the people of refunds of duty.

British Trade Depression.

LONDON, February 24.—At a meeting of the Chambers of Commerce in this city to-day, Mr. Farwood, Conservative member of Parliament from Lancashire, and a prominent merchant and shipowner of Liverpool, presided. He attributed the present depression in British trade to the appreciation of gold assisted by the competition of foreign products and manufactures turned out by skilled labor improved by technical education. The Dublin Chamber of Commerce offered, and the Glasgow Chamber seconded a resolution against weakening the union between England and Ireland, because of the disastrous nature of the results which would ensue to the commercial and trading interests of Great Britain.

Attempted Murder.

MILWAUKEE, Wis., February 24.—At noon to-day, Abbott Lawrence, assistant cashier of the National Exchange Bank, was shot and dangerously wounded, near the Milwaukee Club House, by George A. Wardner, formerly a bookkeeper in the same bank. The ball entered the small of the back and is supposed to have glanced off into the chest. After the shooting, Wardner walked to the central police station, followed by a large crowd of people and delivered himself up. Lawrence is a son of an old and very wealthy resident. It is believed that Wardner was influenced by some fancied wrong. The shooting created the greatest excitement in the city, owing to the prominence of the two men. Both are 33 years of age and unmarried.

The Currency Question.

WASHINGTON, February 24.—The general subject of the issue of Treasury notes and silver certificates of small denominations was discussed at to-day's meeting of the House committee on banking and currency. There are now forty-eight bills before the committee touching the subject under consideration. It was the sense of the committee that a general bill, or perhaps two covering the matter should be formulated and reported in lieu of these bills, and with that view the bills will be divided among three sub-committees for examination.

Edison Married.

CLEVELAND, Ohio, February 24.—Thomas A. Edison, the well known electrician, was married this afternoon, at Akron, Ohio, to Miss Nina, daughter of Lewis Miller, a prominent manufacturer and president of the Chautauque Sunday School Assembly. The ceremony was performed at 3 o'clock, at Oak place, Miller's elegant residence, in presence of about 100 invited guests. Lieut. F. W. Tappan, U. S. Navy, was Edison's best man. Mr. and Mrs. Edison go to Edison's winter home near Fort Myers, Florida.

THE PUGET SOUND PIPE CO.

OLYMPIA, W. T.

Sole Proprietors and Exclusive Manufacturers of

Horton's Water Pipe and Couplings.

These pipes are suitable for either water, oil or gas and are made to sustain a pressure of 300 pounds to the square inch, or a gravity head of over 100 feet. Water is brought from any elevation in them without leakage or waste. The tube is made of the best Puget Sound pipe which, being thoroughly seasoned, is spirally bound with strong iron bands of suitable strength, and is under great pressure. The whole exterior is then given a coat of asphaltum, which protects the iron from rust and the wood from insects or decay. The pipe is made in 6 feet lengths and spirally banded and connected with iron couplings. We manufacture this pipe in all sizes from 2 to 12 inches. The action of the water makes it perfectly water tight in a few hours in point of durability this pipe exceeds all others. The asphaltum coating affords a thorough and almost everlasting protection to the iron banding against rust, while the wood being constantly saturated with water, will last for generations. It can be laid for from 1 to 4 cents per foot, according to sizes. It is from 1/2 to 1 1/2 the cost of iron and is equal in all respects to the very best standard iron pipe now in use. It will never corrode or give the water a bad taste, as is the case with iron; is less liable to freeze, and can be sent to distant points at 1/2 the cost. City or town corporations, or any others contemplating a system of water supply will find it greatly to their advantage to consult us for further information. All work guaranteed.
